- 4. About ISMLL

J.C. Penney

The company J.C. Penney sells shirts through a network of local warehouses.

Formerly, it replenished sold items by stocking:

- Each warehouse stocks shirts for up to 3 month.
- Warehouses are supplied from regional storehouses that stock shirts for up to 6 months.

Lars Schmidt-Thieme, Information Systems and Machine Learning Lab (ISMLL), Institute BW/WI & Institute for Computer Science, University Course on Information Systems 2, summer term 2008

J.C. Penney

Information Systems 2 / 1. What are Information Systems?

Nowadays, replenishing works completely different:

- At checkout each transaction is reported electronically to TAL Apparel Ltd. in Hongkong.
- TAL produces a new shirt like the one just bought and ships it directly to the local warehouse.
- TAL's application system uses the demand on different shirts in the past to predict the number of shirts needed in each store.
- TAL assigns article numbers and bar codes for easy identification of different shirts.

Lars Schmidt-Thieme, Information Systems and Machine Learning Lab (ISMLL), Institute BW/WI & Institute for Computer Science, University of Hildesheim Course on Information Systems 2, summer term 2008 2/26

 TAL offers information about which shirts have been sent, when, and where they are right now.

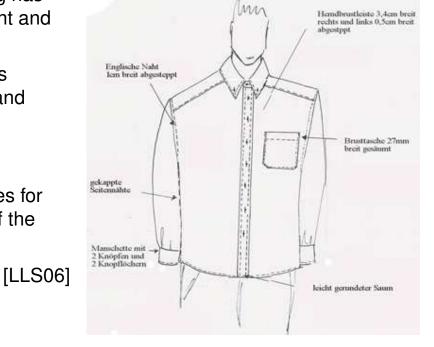

J.C. Penney

The new method for replenishing has side effects, e.g., for development and testing of new shirts:

- TAL produces a lot of variants (colors, sizes, shapes, etc.) and sents them directly to the warehouses.
- Penney can base their choices for new shirts on sales figures of the test shirts.

Lars Schmidt-Thieme, Information Systems and Machine Learning Lab (ISMLL), Institute BW/WI & Institute for Computer Science, University of Hildesheim Course on Information Systems 2, summer term 2008 3/26

Information Systems 2 / 1. What are Information Systems?

## Information Systems

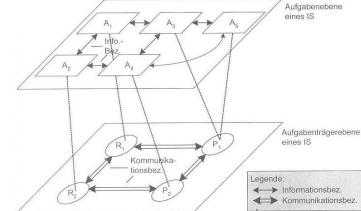

Information Systems 2 / 1. What are Information Systems?

## Information Systems

"Unter einem Informationssystem [wird] ein System verstanden, das Informationen verarbeitet, d.h., erfasst, überträgt, transformiert, speichert und bereitstellt" [FS06, p. 1].

"A computer is a machine which manipulates data according to a list of instructions" [English Wikipedia, "Computer", 23.10.2007].

"Ein Computer, auch Rechner genannt, ist ein Apparat, der Informationen mit Hilfe einer programmierbaren Rechenvorschrift verarbeiten kann" [German Wikipedia, "Computer", 23.10.2007].

Lars Schmidt-Thieme, Information Systems and Machine Learning Lab (ISMLL), Institute BW/WI & Institute for Computer Science, University of Hildesheim Course on Information Systems 2, summer term 2008 6/26

Information Systems 2 / 1. What are Information Systems?

# Application Systems vs. Information Systems

### An Application System is a set of

interoperating

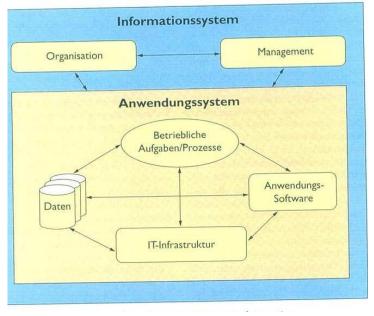

- software programs,
- IT infrastructure and
- data

that supports a specific business domain.

### An Information System is an

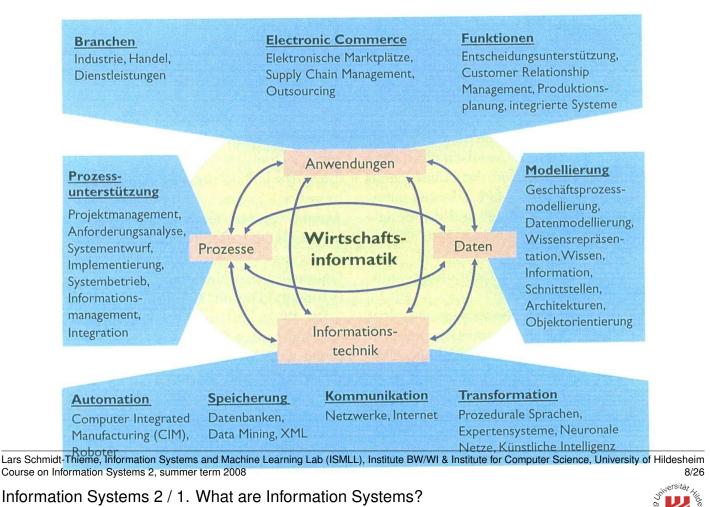

application system plus its business context, i.e., the organisation, people, etc. that use the system.

Application systems are **technical systems**, information systems **socio-technical systems**.

[LLS06]

# Aspects of Business Information Systems [LLS06]

Software usually not considered to be Part of an Information System

## 1. office software

— but, companies started to collect all their documents in document warehouses and index them by knowledge bases.

# 2. embedded software to operate a machine

— but, in many scenarios machines generate some output that may be of further interest and thus should be managed by an information system.

## 3. educational software

— but, some modern educational software no longer is a monolithic isolated stand-alone piece of software, but connects learners and teachers through an online platform.

# 4. entertainment software

Information Systems Program Contents — GI Recommendation [fI03]

#### 1. Basics:

subdisciplines; relation to business management; law; behavioral sciences; computer industry.

# 2. Information and Communication Technology:

computer architecture; hardware, software, middleware and development platforms; networks; communication.

#### 3. Information Management:

information as agent of production; information supply; information networks; security; information system architectures.

4. Business Information Systems / E-Commerce & E-Business: information systems oriented at economics sectors; information systems oriented at processes and functions; integration; electronic market places.

#### 5. Application System Development:

analysis, design, implementation, deployment; web-based systems; choice, customization and deployment of standard software; system integration.

#### 6. Data and Knowledge:

data models and data bases; data warehouse; knowledge representation and engineering.

#### 7. **Disposition and Decision Support:** mathematical and statistical models and

methods; operations research; artificial intelligence; methods of strategic management.

Information Systems 2 / 3. Organizational stuff

## Exercises and tutorials

- There will be a weekly sheet with two exercises handed out each Tuesday in the lecture.
  1st sheet will be handed out Wed. 23.4. in the tutorial (exception)
- Solutions to the exercises can be submitted until **next Tuesday before the lecture**, 1st sheet is due Tue. 29.4.
- Exercises will be corrected.
- Tutorials each Wednesday 14–16, 1st tutorial at Wed. 23.4.
- Successfull participation in the tutorial gives up to 10% bonus points for the exam.

## Exam and credit points

- There will be a written exam at end of term (3h, 5 problems).
- The exam covers both courses,
  - IS1 with 3 ECTS by 1 (more detailed) problem and
  - IS2 with 6 ECTS by 4 problems.
- Both courses together give 9 ECTS (2 SWS IS1, 2+2 SWS IS2).
- The IS2 course gives 6 ECTS (2+2 SWS).
  - ECTS = European Credit Transfer System
  - 1 ECTS  $\approx$  30h workload (for the students)
  - 180h: 14 weeks à 1.5 h lecture: 21 h
    14 weeks à 1.5 h tutorial: 21 h
    à 5 h solving exercises: 70 h
    à 4 h post preparation: 56 h
    once 16h exam preparation: 16 h
    total work load: 184 h
